I went on Newsmax and was joined by former Minnesota governor Tim Pawlenty to discuss the incident of the anti-ICE rioter being shot dead when she was accelerating her vehicle toward an ICE agent. The leftist woman's death has sparked calls by leftists for retribution, insurrection, and violence across the U.S.

On Wednesday night in Minneapolis, hundreds shut down the roads in freezing temperatures and snow to protest and demand open borders. Similarly themed rallies are occurring in Portland and Seattle. The protests across the country are organized by the same communist and leftist groups and networks involved in the pro-Nicolas Maduro rallies earlier this week.

do not forget what you learned. wear a mask and gloves. cover your eyebrows, ears, and hair. stick with your crew or pick a buddy in the crowd. never panic. focus on your breathing. make decisions about what to do rapidly, just do not freeze up. be the change.
